

R52-ELT Electric Golf Green Roller

52" Swath
3 Smoothing Heads
No Line Marking

Tru-Turf's premier R52-ELT Tri headed Golf Greens Roller boasts a state of the art 48volt fully programmable system that drives a powertrain capable of coping with the toughest of operating conditions.

Unlike opposition golf rollers the R52-ELT is capable of rolling large areas in quick time. The patented unique set of tri rollers and contour drive roller (World's first) follow the most difficult of shaped greens surfaces without leaving line crease marks on the green.

Stainless steel roller bearings, heavy duty axles and tough trailer arms all add up to a rugged golf greens roller.
